Question 1

```
if(!require("neonDivData")) install.packages("neonDivData")
```

```
## Loading required package: neonDivData
```

```
data_plant
```

```
## # A tibble: 915,539 x 26

Question 4

```
library(tidyr)
n_all_long <- n_all %>%
  pivot_longer(cols = -c(siteID),
               names_to = "spatial_scale", "richness",
               values_to = "richness")

n_all_long
```

```
## # A tibble: 141 x 3
##   siteID spatial_scale richness
##   <chr>   <chr>         <int>
## 1 ABBY   _1m2             434
## 2 ABBY   _10m2            443
## 3 ABBY   _100m2           261
## 4 BARR   _1m2             152
## 5 BARR   _10m2            153
## 6 BARR   _100m2            91
## 7 BART   _1m2             199
## 8 BART   _10m2            208
## 9 BART   _100m2           127
## 10 BLAN  _1m2             628
## # ... with 131 more rows
```

Question 5

```
library(ggplot2)
data(n_all_long)
```

```
## Warning in data(n_all_long): data set 'n_all_long' not found
```

```
ggplot(data = n_all_long, aes(x = spatial_scale, y = richness, group = siteID, colour = siteID)) + geom.
```
